

ENGINEERING SERVICES OFFERED:

- 3D Solid Modeling
- Full Mold Design
- Mold Flow Analysis
- Software and File Types Supported
 - Pro/ENGINEER - KeyCreator - SolidWorks
 - Mastercam - CAM-TOOL - Step
 - Parasolid - IGES - DXF
 - DWG

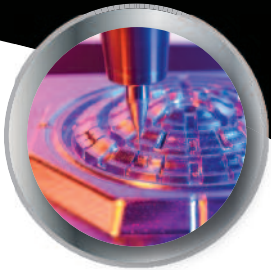

MACHINING CAPABILITIES

- High Speed Machining and Hardmilling
- CNC Wire EDM
- CNC Sink EDM

ADDITIONAL SERVICES OFFERED

- Mold Qualification
- First Article Inspection
- Capability Studies
- Custom End Of Arm Tooling

PRECISION INJECTION MOLDS

WHO WE ARE

Since 1978 Mold-Tech, Inc. has been building the highest quality plastic injection molds for the Medical, Electronics, Consumer and Automotive industries. Mold-Tech specializes in designing and building complex, multi-cavity, tight-tolerance injection molds using the latest technologies. The state-of-the-art facility employs an experienced and dedicated staff that is focused on providing a quality product and superior customer service. A key to our success is our highly trained employees who are constantly looking for new technologies and process improvements to aid in the development of high quality molds. This commitment provides our customers with advanced processes not found with other mold manufacturers.

TYPES OF MOLDS INCLUDE:

- MULTI-CAVITY
- HOT RUNNER
- AUTO UNSCREWING
- IN-MOLD DECORATING
- INSERT
- MICRO
- LSR
- MIM
- SHUTTLE
- MULTI-SHOT

ON TIME, EVERY TIME

Over the last 5-years Mold-Tech has averaged a 99% on-time delivery record. Our customers trust that we will meet or exceed the delivery requirements and provide exceptional support for the life of the program.

PROVIDING QUALITY MOLDS-GUARANTEED

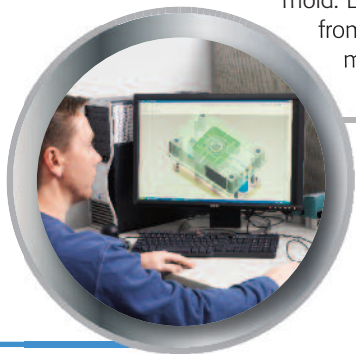

Mold-Tech has been ISO 9001 certified since 2000 and puts great effort into an evolving quality system that ensures utilized processes are documented and consistent. The certification takes great commitment and effort from everyone at Mold-Tech. This certification is an accomplishment that provides our customers with exceptional value, products and services.

PRECISION MOLDS

The molds produced by Mold-Tech range from small to medium sized molds for a variety of different industries for customers both large and small. Leading edge technology is employed in order to meet the changing needs its customers. Being able to provide tight tolerance molds has been a key to the success of Mold-Tech. Each mold is built directly from the database used for the mold design and the exact dimensions are used for the tooling to create the mold. Every mold is consistent from cavity to cavity and mold to mold.

A DIFFERENT APPROACH

Our focus is customer service. Our business philosophy is to form a partnership with our customers from initial concept and design through final production and delivery. Our dedicated project managers ensure successful projects by maintaining effective communication throughout the process.
